## The Flower of Egypt

It was a sunny morning in the far away Egypt. In a garden surrounded by orchards and flowers, a little girl was playing with her dolls.

"Mother," called her mother's voice, "come here. We must make garlands and bouquets for our guests who come today."

"I will," she replied, and she quickly obeyed the summons. She went to prepare the floral gifts for the guests. These were made of various flowers according to the time of the season. Sometimes they were made of roses and again sometimes of carnations.

Today the flowers were lotus blossoms. One of the slaves had gathered them from the pool in the garden. The lotus flower is a beautiful water lily which has always been told to be the flower of the gods.

There were two kinds of these blossoms. One was white and opened in the evening, the other blue with its petals expanded in the sunshine and it looked like the hue of the sky above.

The little girl was so happy because she could see it when she was at play, while the white one opened only at night.

While she worked on the garlands she asked many questions about her father.

"Is our country's flower?" replied her mother. "The lotus of the Nile and it is loved everywhere."

Then the pleasant task of garland making was finished. The lotus and the blue one with its petals expanded in the sunshine and it looked like the hue of the sky above.

## Heard and Seen at Advertiser Office

Chas. G. Jenness of Rochester, N. H. writes from Chicago:

"Elizabeth and I are trying to see a bit of the tremendously big 3-mile show."

No doubt they will turn in nights weary, foot-sore and disgusted over the immensity of the affair!

A new half bushel basket was lost from someone's car the first of the week and brought to the office by one of the Sessions boys who picked it up. Earl Pelt also brought in a black bird glove and one of the Hove girls found a pair of glasses on Beal Street and brought them in.

Mrs. Percy Grover of Bolster's Mills sends us a box containing ripe raspberries, with a note that says: "Talk about a change in seasons, here is one, I think. Was out hunting down in Sebago, Maine, found quite a patch of ripe raspberries and here are some. They are wild ones, not the overbearing cultivated. Picked October 16, by Mrs. Percy Grover of Bolster's Mills, Me."

What appeared to be a large eagle was seen over South Paris village Saturday afternoon by Harvey E. Powers and his daughter, Lorraine. The bird made a number of circles, then followed the little Androsoggin in the direction of Oxford. Jack Flynn, jailer at the court house, also reports seeing an eagle at court near Summer. Both birds may be one and the same.

The Norway National Bank is circulating bank notes to the extent of its capital. To date \$85,000 is ready. All arrived last week and for six days not an old or soiled bill was passed through the tellers' windows. Probably the first time in Norway that ever happened. The money arrived in sheets each having six bills and the cutting up took place in the Advertiser Office. One lot 452 sheets of the \$5 denomination represented \$13,510. Little wonder of us felt like a million dollars while the boodle was on the premises.

The deer hunting season opened in six counties in the State Monday. Under the law the limit for deer is one of either sex.

Hunting opened Monday in Aroostook, Penobscot, Somerset, Piscataquis, Franklin and Oxford. The season continues until November 30th.

In eight other counties, Androsoggin, Cumberland, Kennebec, Knox, Lincoln, Sagadahoc, Waldo and York, the season opens November 1, for 30 days. The open season for Hancock and Washington counties has been set for Nov. 1, to December 15th.

The season of bear opened October 1, for 30 days.

Mrs. Ellen M. Davenport, Worcester, Mass. who writes about many interesting things locally, contributed to our museum a copy of the Newburyport Herald, dated April 14, 1933. The paper published by J. B. Moss and W. H. Brewster, the copy being Vol. XXXIX No. 9 was given to us by general information, patent medicine and small local ads. A news item of interest is the record time for a sailing vessel between Providence and New York, which made the distance in 14 hours and 4 minutes.

When we read of the kindness of Mrs. Castello, says: "This little thing is a flower worth a king's ransom. It has been our observation that the thirsty are usually going in the opposite direction. Does 'getting back' suppose that she has been away or something? Could she have been away back to her children, who must have suffered during all the trials of their mother, and wouldn't it show more earnest ambition than getting into the fierce line light that beats about Mrs. Castello's head?"

## NOT POUNDAGE BUT SPORT

The Federal Bureau of Fisheries estimates that on the average a fisherman spends \$2 for each pound of black bass he catches, \$3 a pound for trout, \$5 a pound for striped bass. This represents outlay for tackle, boats, supplies, and transportation but takes no account of the fisherman's time. If the figures are correct, they confirm a popular impression that among true anglers of sport the angler is deserving of top-notch rating. Opening of the trout season gives to New York anglers an opportunity to make their own tests.

There are fishermen who will consider the estimates modest. If the Bureau of Fisheries could think up some way to guarantee a pound of trout for each \$3 spent the hoarding problem of which there is so much talk nowadays, would be on its way to solution. Any angler so commercially minded as to ask remuneration for his time is no true fisherman, but it is comforting to have a nice string to show in return for the expenditure involved in a day on lake, brook or river.
